## PROJECTS

## Home automation using Resberry PI(ARM processor)

Performed Embedded 'C' coding and PCB designing

Ø This project makes use of standalone ARM11 processor for image processing. A USB camera is used with ARM11 processor to enable the project with machine vision.

Ø This project can be used to control the high voltages home appliances such as lamp, fan etc. using machine vision. User needs to show the images drawn on a paper to the camera.

Ø Based on the predefined logic, the electrical devices will be turned ON or OFF.

## TELECOMMUNICATION

Sound knowledge of accessory units like system, cables, fibre-optics etc.

Basic Knowledge about internet protocols, Wireless internet protocols and network router protocols.
